PUBLIC SAFETY ISSUE

Several complaints of dogs running in packs have been received.

A short term solution to deal with the urgency of this issue is to destroy the dog(s).

Long term solutions are being discussed and planned and will be implemented to address this concern.

MCFN is not in favour of taking extreme measures to address this concern, but in the interest of protecting our vulnerable population (children and elders), action must be taken.

Pet owners are advised to secure their dogs in their yards and/or homes.

Bertha Sutherland, Associate Executive Director

SAFETY NOTICE: KEEP YOUR DOG SECURE

Help keep our community safe: ensure your pet is securely tied in your yard.

Your yard is the safest place for your dog. Aggressive animals can pose a risk to people, especially young children. Keep both your dog and community members safe by ensuring your pet is tied up at all times.

**Thank you,
Moose Cree First Nation**
