

# Drone Flight Testing in Moose Factory

The Moose Cree First Nation and the Town of Moosonee have given permission to Drone Delivery Canada to operate test flights of a drone delivery service across the Moose River. Tests will begin in November and last a few weeks as the company studies flight paths and locations in Moosonee and on Moose Factory island. All flights will be subject to approval by Transport Canada to ensure federal safety standards are met. Flights will not interfere with air traffic and will be conducted away from people's homes to ensure minimal interference.
