

Water Conservation Notice

Friday, December 05, 2014

Affected Community: **Moose Factory, On.**

Please be advised that the Water Treatment Plant would like all residents of Moose Factory to exercise good water conservation practices during the decrease of water pressure. This operation will begin December 5, 2014 at 9:00 p.m. to 9:00 a.m. the following morning and this will continue daily until the water levels are back to normal. These practices are imperative to preserve the water supply by reducing high water demands during the winter months.

Ways to conserve water:

Delay flooding of rinks, minimize flushing the water during the nights and make sure that faucets are turned off tightly to prevent dripping, use your dishwasher and washing machine only when there are full loads, and turn the water off while brushing your teeth.

For more information contact the water plant at (705) 658 6520.

We apologize for the inconvenience this may have caused.

Kind regards,

Ontario Clean Water Agency
