INCREASED TRAFFIC ON OTTER RAPIDS ROAD
Motorists Are Asked to Exercise Extreme Caution

TIMMINS – Ontario Power Generation and Coral Rapids Power advises of increased traffic on Otter Rapids Rd., north of Smooth Rock Falls, due to construction of the new Peter Sutherland Sr. Generating Station at New Post Creek.

Motorists, including those traveling to and from the Wetum Winter Rd., are asked to exercise extreme caution and reduce speeds when approaching on-coming traffic, as some loads may be wider than normal.
