

Water Conservation Notice

Thursday, March 30, 2017

Area Affected: **Moose Factory, On.**

A decrease in Water Pressure will begin Thursday, March 30, 2017 from 6:00 P.M to 6:00 A.M, Friday, March 31, 2017.

Testing and/or preventative maintenance on the Emergency Fire supply system at the hospital requires a significant amount of water. Unfortunately, internal maintenance has caused our reservoirs to deplete. To ensure sufficient water reserves for both the community and to finalize testing for the hospital's emergency fire supply system, the pressure will need to be decreased tonight to allow the reservoir levels to build up.

We apologize for any inconvenience this may cause. At this time it is necessary to try to prevent a system wide loss of pressure and associated boil water advisory.

Please check for updates on the Moose Cree website and Facebook page, local bulletin Boards, or contact Nadia Kapashesit or Brad Stephen from OCWA, Moose Factory, at (705) 658 6520 for more information.

Kind regards,

Ontario Clean Water Agency
