

ADVISORY: Attention Dog Owners

In the interest of public safety and calming fears amongst community members, **all dog owners of aggressive breeds must have control of their dogs when in public.**

Control means having control of your pet by having either a leash and/or muzzle on your dog.

Not only have we received complaints about these aggressive breeds, but also about dogs running in packs which puts the safety of our children and community members at risk. We stress again the importance of ensuring your dog is tied up. This is in the interest of public safety for our children, elders and adults, as well for the safety of your pets.

Thank you for your cooperation in keeping our community safe.
