**Info about the Project:** Climate Change is a scientific term used to describe when the World temperature rises due to increased carbon dioxide levels in the atmosphere. The changes are often felt World wide and we are hoping to learn about this and what the impacts are to our homelands. We want to learn about experiences, changes, and occurrences that our community has faced and develop an adaptation plan on how to adapt to these changes into the future and help in the protection of our environment. We plan on our first workshops on December 5-7<sup>th</sup> 2017 in Moose Factory ON. Honoraria will be provided.

Please submit form to: Moose Cree First Nation Main Office or

Moose Cree First Nation will be developing a *Climate Change Adaptation Community Plan*. As we are looking to understand what *Climate Change* means, what potential impacts it will have to our community and how we can look at ways to address & adapt to those concerns. We will be seeking input from all demographics and age groups, as there are plans in the near future to host an Information Session to implement this important work, and create a *Community Working Group*.

**For more information, please contact:**
